

BUILDERS™ VINYL WINDOWS AND PATIO DOORS

PERFORMANCE FEATURES

All Operating Types

- Integral nailing fin for improved installation integrity
- Consistent, high-quality vinyl throughout profile for strength and durability
- Titanium dioxide provides long-lasting vinyl color
- Metal reinforcement at the check rail to eliminate sagging and provide long-term reliable operation
- Integrated weep system uses gravity to pull water through the weep hole and eliminate it from the window
- Compression weatherstripping ensures a tight fit, preventing air and water infiltration
- A continuous head and sill on 2, 3 and 4-unit assemblies limits vulnerability to air or water infiltration
- Standard Low-E 11/16" glass for thermal efficiency

PREMIUM™ ATLANTIC VINYL WINDOWS AND PATIO DOORS

PERFORMANCE FEATURES

All Operating Types

- This glass stands up to strong impacts from wind-borne debris as well as harsh coastal conditions.
- In fact, ImpactGard® features the industry's leading laminated glass technology that can withstand a nine-pound piece of lumber striking it head-on at approximately 34 miles per hour.
- It also reduces sound transmission, blocks up to 95 percent of harmful UV rays and enhances home security
